

Tenerife Sur Airport extension

Tenerife, Spain / 2020

Structural type
Client
Constructor
Scope

Precast structure with beams executed on site and steel roofing
SACYR
SACYR
detailed design

The new facility will connect the existing T1 and T2 with several floors, increasing the airport landside's surface by 14,000 sqm. This intervention aims to reach a handling capacity of 16 million passengers per year.
